2. Press the wash button you want to use (such as buttocks wash.)

Personal setting lock

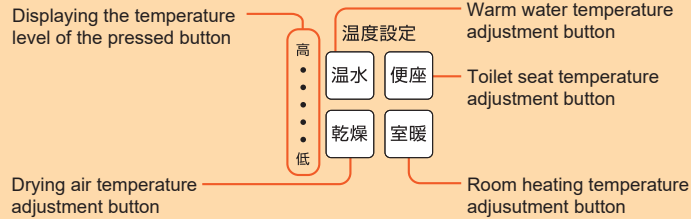

More comfortable! More Energy-Savings!

How to Use

Temperature Adjustment

Temperature can be changed to "Warm Water", "Toilet Seat" and "Warm Air" (only models equipped with warm air dryer).

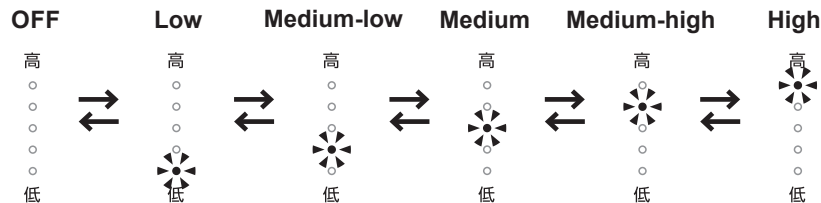

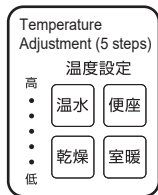

- 1 Press the button of the temperature you want to change.
- 2 Press the button selected in step 1 repeatedly until a desired temperature level lights up.

If the button is not pressed for about 10 seconds, the temperature adjustment LED will go off, but the setting will be retained.

If the temperature adjustment LED goes out before the setting is completed, start all over again at step 1.

The setting changes each time the button is pressed once

*There is no "OFF" setting for Drying air or Room Heating.

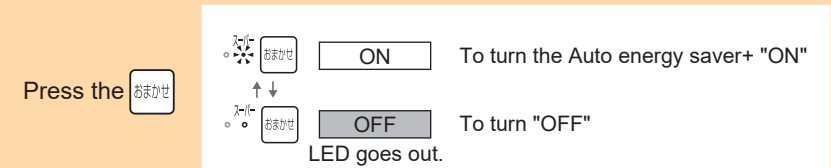

Energy-Saving Features

Auto energy saver+

The Washlet memorizes the time slot when the toilet is used less frequently and lowers the toilet seat temperature automatically to save energy.

*It takes approximately 10 days to determine the time slot where the toilet is used less frequently.

You can turn the feature ON/OFF at your discretion.

ENERGY-SAVING TIMER

Once set, the toilet seat heater turns off everyday at that time to save energy. (The energy-saving time period can be set to 6 or 9 hours.)

Example When using energy-saving function for 6 hours(1:00 - 7:00am).

When the time (1:00 am) you want to start energy saving function is reached, press the タイマー (Timer) button repeatedly until the "6" LED lights up.

What to Do?

If the water does not flow due to a power outage.

In the event of a power outage, you can flush the toilet bowl with the manual water supply cord (orange) and the manual water storage cord (white).

The toilet bowl can also be flushed clean by the FLUSHING button.
