# How to Use

Remote control back side

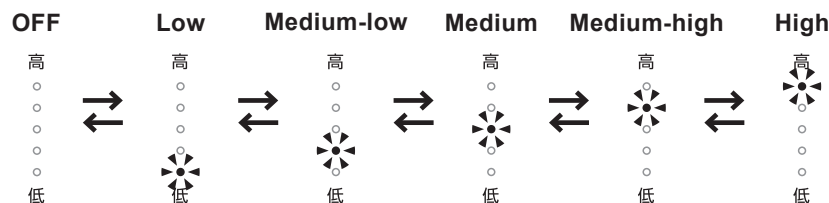

## Temperature Adjustment (5 levels)

Displaying the temperature level of the pressed button

- 1 Choose and press the button of the temperature that you want to set.
- 2 Press the button selected in step 1 repeatedly until a desired temperature level illuminates.

The setting changes each time the button is pressed once

## Energy saver features

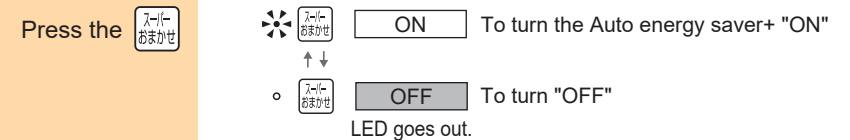

### Auto energy saver+

The WASHLET detects time periods when the toilet is not used and automatically turns off the toilet seat heater.

\*It takes about 10 days for the product to determine the periods when it is not used.

You can turn the feature ON/OFF at your discretion.

The setting changes each time the button is pressed once

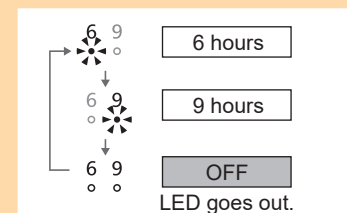

### Timer energy saver

Once the time is set, the toilet seat heater and other features turn off automatically during the set time period every day. (The energy-saving time period can be set to 6 or 9 hours.)

**Example** When using energy-saving function for 6 hours(1 am - 7 am).

When the time (1 am) you want to start energy saving function is reached, press the **タイマー** button repeatedly until the "6" LED lights up.

# What to Do?

If the water does not flow due to a power outage.

In the event of a power outage, you can flush the toilet bowl with the manual water supply cord (orange) and the manual water storage cord (white).  
The toilet bowl can also be flushed clean by the FLUSHING button.
